

Pre-anesthetic Testing

Please initial next to each procedure you would like carried out.

_____ **Pain Management**

We try to keep your pet as pain-free as possible by minimizing the amount of tissue invaded. We are unable to determine each pet's tolerance and therefore, we reserve the right to administer and dispense pain medications if we feel that your pet is uncomfortable. The medication would be an additional cost for you ranging from \$14 to \$55 depending on the size of the pet and the severity of pain.

_____ **Risk Assessment Profile** (optional): Patients younger than 7 years \$45

Includes the following:

- Creatinine (kidney)
- Glucose (diabetes)
- PCV (blood volume)
- ALT (liver)
- Total Protein (hydration)

_____ **Diagnostic Panel** (required): Patients over 7 years or with questionable health \$100

Includes all test listed in the Risk Assessment Profile (above), plus:

- ALB (protein)
- Amylase (liver)
- Calcium (certain cancers)
- Globulin (immune status)
- Cholesterol
- Potassium
- Bilirubin (liver)

Discounted Elective Procedures
