

Vaccination Schedule — Cats

There are certain vaccines that cause reactions and possible tumors, so we only use the safest products for your pets.

(See bottom of page for explanations of the abbreviations.)

Indoor-only cats

- PCRP and RV every year

Indoor/Outdoor cats:

- FeLV/FIV/HW combo test
- FeLV (total of 2) and FIV (total of 3) boosters given every 3 weeks
- PCRP and RV are given every year.
- FeLV and FIV are also given every year for outdoor cats.

Kittens

- Kittens get PCRP every 3 weeks for a total of 3.
- Rabies (RV) is given around 4 months old.
- 1st FeLV and booster are given to kittens the first year.

All ages

- Fecal exams should be done every year to check for intestinal parasites especially for indoor/outdoor cats.

Abbreviations
